For middle class taxpayers, the glass is always half empty...

44 percent of every glass of beer is already taxes. Now, Lansing politicians want to increase the beer tax even more.

I'm signing this petition to voice my opposition to an increased tax on beer. 44 percent of every glass of beer is already taxes. Lansing politicians should stop balancing the budget on the backs of the middle class. Enough is enough! A higher beer tax hurts middle class taxpayers, small businesses and Michigan's economy. **Say 'No' to increasing the beer tax!**
